

Statement on Coronavirus

Dear Members and Partners,

The DECT Forum Board recognizes the importance of supporting our members and partners through good and challenging times. The Coronavirus outbreak is impacting how we live, work, and communicate with each other.

Our top priority is to ensure the health and safety of all our members and partners. In order to do this, we have moved to a 100% virtual workforce.

As a marketing organization, which aims to promote the DECT technology on behalf of our members, we will continue to leverage our mission and focus on digital marketing and communication during these times.

This means that we will enforce our communication and promotion on all digital platforms, on the [website](#) and on our existing social media channels at [Twitter](#) and [LinkedIn](#).

We will also continue to keep on holding our bi-weekly online Working Group meetings.

The following Workings Groups are active:

- Regulatory (Mondays at 3pm CEST)
- Marketing (Tuesdays at 11am CEST)
- DECT-5G Business (Wednesdays at 3pm CEST)
- Certification (Thursdays at 3pm CEST).

Members are encouraged to participate in the Working Groups.

With these measures the DECT Forum will ensure business continuity during the pandemic. Please consult the DECT Forum website and social media channels on a regular basis for updates.

In case of any further questions, we kindly ask our members to contact the Secretariat.

Sincerely,

Andreas Zipp
Chairman DECT Forum
